▼ **M216****CHAPTER 21****MISCELLANEOUS EDIBLE PREPARATIONS****Notes**

1. This chapter does not cover:
  - (a) mixed vegetables of heading 0712;
  - (b) roasted coffee substitutes containing coffee in any proportion (heading 0901);
  - (c) flavoured tea (heading 0902);
  - (d) spices or other products of headings 0904 to 0910;
  - (e) food preparations, other than the products described in heading 2103 or 2104, containing more than 20 % by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof (Chapter 16);
  - (f) yeast put up as a medicament or other products of heading 3003 or 3004; or
  - (g) prepared enzymes of heading 3507.
2. Extracts of the substitutes referred to in note 1(b) are to be classified in heading 2101.
3. For the purposes of heading 2104, the expression 'homogenised composite food preparations' means preparations consisting of a finely homogenised mixture of two or more basic ingredients such as meat, fish, vegetables, fruit or nuts, put up for retail sale as food suitable for infants or young children or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition, no account is to be taken of small quantities of any ingredients which may be added to the mixture for seasoning, preservation or other purposes. Such preparations may contain a small quantity of visible pieces of ingredients.

**Additional notes**

1. *For the purposes of subheadings 2106 10 20 and 2106 90 92, the term 'starch' also covers starch breakdown products.*
2. *For the purposes of subheading 2106 90 20, 'compound alcoholic preparations, other than those based on odoriferous substances, of a kind used for the manufacture of beverages' means those preparations having an alcoholic strength by volume of more than 0,5 % vol.*
3. *For the purposes of subheading 2106 90 30, the term 'isoglucose' means the product obtained from glucose or its polymers with a content by weight in the dry state of at least 10 % fructose.*
4. *For products of subheadings 2106 90 30 and 2106 90 59, the sucrose content, including other sugars expressed as sucrose, is to be determined by the refractometry method (expressed in degrees Brix in accordance with the Annex to Commission Implementing Regulation (EU) No 974/2014 <sup>(1)</sup>).*
5. *Other food preparations presented in measured doses, such as capsules, tablets, pastilles and pills, and which are intended for use as food supplements are to be classified under heading 2106, unless elsewhere specified or included.*

<sup>(1)</sup> Commission Implementing Regulation (EU) No 974/2014 of 11 September 2014 laying down the refractometry method of measuring dry soluble residue in products processed from fruit and vegetables for the purposes of their classification in the Combined Nomenclature (OJ L 274, 16.9.2014, p. 6).

## ▼M216

6. Preparations with a basis of coffee, tea or maté or extracts, essences or concentrates thereof, with a sugar content of 97 % or more by weight, calculated on the dry matter, are excluded from classification under heading 2101 and are, in principle, to be classified in Chapter 17. The character of such products is no longer deemed to be determined by the coffee, tea or maté or extracts, essences or concentrates thereof.

## CHAPTER 22

**BEVERAGES, SPIRITS AND VINEGAR****Notes**

1. This chapter does not cover:
  - (a) products of this chapter (other than those of heading 2209) prepared for culinary purposes and thereby rendered unsuitable for consumption as beverages (generally, heading 2103);
  - (b) sea water (heading 2501);
  - (c) distilled or conductivity water or water of similar purity (heading 2853);
  - (d) acetic acid of a concentration exceeding 10 % by weight of acetic acid (heading 2915);
  - (e) medicaments of heading 3003 or 3004; or
  - (f) perfumery or toilet preparations (Chapter 33).
2. For the purposes of this chapter and of Chapters 20 and 21, the alcoholic strength by volume shall be determined at a temperature of 20 °C.
3. For the purposes of heading 2202, the term 'non-alcoholic beverages' means beverages of an alcoholic strength by volume not exceeding 0,5 % vol. Alcoholic beverages are classified in headings 2203 to 2206 or heading 2208 as appropriate.

**Subheading note**

1. For the purposes of subheading 2204 10, the expression 'sparkling wine' means wine which, when kept at a temperature of 20 °C in closed containers, has an excess pressure of not less than 3 bar.

**Additional notes**

1. *Subheading 2202 10 00 covers waters, including mineral waters and aerated waters, containing added sugar or other sweetening matter or flavoured, providing they are for direct consumption as a beverage.*
2. *For the purposes of headings 2204 and 2205 and subheading 2206 00 10:*
  - (a) *'actual alcoholic strength by volume' means the number of volumes of pure alcohol contained at a temperature of 20 °C in 100 volumes of the product at that temperature;*
  - (b) *'potential alcoholic strength by volume' means the number of volumes of pure alcohol at a temperature of 20 °C capable of being produced by total fermentation of the sugars contained in 100 volumes of the product at that temperature;*
  - (c) *'total alcoholic strength by volume' means the sum of the actual and potential alcoholic strengths;*
  - (d) *'natural alcoholic strength by volume' means the total alcoholic strength by volume of a product before any enrichment;*
  - (e) *'% vol' is the symbol for alcoholic strength by volume.*
3. *For the purposes of subheading 2204 30 10, 'grape must in fermentation' means the product derived from the fermentation of grape must, having an actual alcoholic strength by volume of more than 1 % vol and less than three-fifths of its total alcoholic strength by volume.*

▼ **M216**

4. For the purposes of subheadings 2204 21, 2204 22 and 2204 29:

A. 'total dry extract' means the content in grams per litre of all the substances in a product which, under given physical conditions, do not volatilise.

The total dry extract must be determined with the densimeter at 20 °C;

B. (a) the presence in the products of subheadings 2204 21 11 to 2204 21 98, 2204 22 22 to 2204 22 98 and 2204 29 22 to 2204 29 98 of the quantities of total dry extract per litre indicated in 1, 2, 3 and 4 below does not affect their classification:

1. products of an actual alcoholic strength by volume of not more than 13 % vol: 90 g or less of total extract per litre;
2. products of an actual alcoholic strength by volume of more than 13 % vol but not more than 15 % vol: 130 g or less of total dry extract per litre;
3. products of an actual alcoholic strength by volume of more than 15 % vol but not more than 18 % vol: 130 g or less of total dry extract per litre;
4. products of an actual alcoholic strength by volume of more than 18 % vol but not more than 22 % vol: 330 g or less of total dry extract per litre.

Products with a total dry extract exceeding the maximum quantity shown above in each category are to be classified in the next following category, except that if the total dry extract exceeds 330 g/l the products are to be classified in subheadings 2204 21 98, 2204 22 98 and 2204 29 98;

(b) the above rules do not apply to products of subheadings 2204 21 23 and 2204 22 33.

5. Subheadings 2204 21 11 to 2204 21 98, 2204 22 22 to 2204 22 98 and 2204 29 22 to 2204 29 98 shall be taken to include:

(a) grape must with fermentation arrested by the addition of alcohol, that is to say, a product:

- having an actual alcoholic strength by volume of not less than 12 % vol but less than 15 % vol, and
- obtained by the addition to unfermented grape must having a natural alcoholic strength by volume of not less than 8,5 % vol of a product derived from the distillation of wine;

(b) wine fortified for distillation, that is to say, a product:

- having an actual alcoholic strength by volume of not less than 18 % vol but not more than 24 % vol,
- obtained exclusively by the addition to wine containing no residual sugar of an unrectified product derived from the distillation of wine and having a maximum actual alcoholic strength by volume of 86 % vol, and
- having a maximum volatile acidity of 1,5 g/l, expressed as acetic acid;

(c) liqueur wine, that is to say, a product:

- having a total alcoholic strength by volume of not less than 17,5 % vol and an actual alcoholic strength by volume of not less than 15 % vol but not more than 22 % vol, and

▼ **M216**

- obtained from grape must or wine, which must come from vine varieties approved in the third country of origin for the production of liqueur wine and have a minimum natural alcoholic strength by volume of 12 % vol,
- by freezing, or
- by the addition during or after fermentation:
  - of a product derived from the distillation of wine, or
  - of concentrated grape must or, in the case of certain liqueur wines with a designation of origin or with a geographical indication appearing on the list set out in Regulation (EC) No 607/2009 (OJ L 193, 24.7.2009, p. 60) and for which such practice is traditional, of grape must concentrated by direct heat, which, apart from this operation, corresponds to the definition of concentrated grape must, or
  - of a mixture of these products.

However, certain liqueur wines with a designation of origin or with a geographical indication appearing on the list set out in Regulation (EC) No 607/2009 may be obtained from unfermented fresh grape must which does not need to have a minimum natural alcoholic strength by volume of 12 % vol.

6. For the purposes of subheadings 2204 10, 2204 21, 2204 22 and 2204 29:

- (a) 'wines with a protected designation of origin (PDO)' and 'wines with a protected geographical indication (PGI)' are wines which comply with the provisions of Articles 93 to 108 of Regulation (EU) No 1308/2013 of the European Parliament and of the Council (OJ L 347, 20.12.2013, p. 671) and the provisions adopted in implementation of the aforesaid Regulation and defined in national regulations;
- (b) 'varietal wines' are wines which comply with the provisions of Article 120 of Regulation (EU) No 1308/2013 of the European Parliament and of the Council and the provisions adopted in implementation of the aforesaid Regulation and defined in national regulations;
- (c) 'wines produced in the European Union' are wines which comply with the provisions of Regulation (EU) No 1308/2013 of the European Parliament and of the Council and Article 55 of Commission Regulation (EC) No 607/2009.

7. For the purposes of subheadings 2204 30 92 and 2204 30 96, 'concentrated grape must' means grape must for which the figure indicated by a refractometer (used in accordance with the method prescribed in the 'Compendium of International Methods of Analysis of Wines and Musts' of the International Organisation of Vine and Wine, as published in the 'C' series of the Official Journal) at a temperature of 20 °C is not less than 50,9 %.

8. Only vermouth and other wine of fresh grapes flavoured with plants or aromatic substances having an actual alcoholic strength by volume of not less than 7 % vol shall be regarded as products of heading 2205.

9. For the purposes of subheading 2206 00 10, the expression 'piquette' means the product obtained by the fermentation of untreated grape marc macerated in water or by the extraction of fermented grape marc with water.

10. For the purposes of subheadings 2206 00 31 and 2206 00 39, the following are regarded as 'sparkling':

- fermented beverages in bottles with 'mushroom' stoppers held in place by ties or fastenings,

▼ **M216**

- fermented beverages otherwise put up, with an excess pressure of 3 bar or more, measured at a temperature of 20 °C.
11. For the purposes of subheadings 2209 00 11 and 2209 00 19, the expression 'wine vinegar' means vinegar obtained exclusively by acetous fermentation of wine and having a total acidity of not less than 60 g/l, expressed as acetic acid.
12. Subheading 2207 20 covers mixtures of ethyl alcohol used as raw material to produce fuels for motor vehicles, of an alcoholic strength by volume of 50 % or higher and denatured with one or more of the following substances:
- (a) automotive petrol (conforming to EN 228);
  - (b) tert -butyl ethyl ether (ethyl tert -butylether, ETBE);
  - (c) methyl tert -butylether (MTBE);
  - (d) 2-methylpropan-2-ol (tert -butyl alcohol, tertiary butyl alcohol, TBA);
  - (e) 2-methylpropan-1-ol (2-methyl-1-propanol, isobutanol);
  - (f) propan-2-ol (isopropyl alcohol, 2-propanol, isopropanol).
- The denaturants referred to in points (e) and (f) of the first paragraph must be used in combination with at least one of the denaturants listed in points (a) to (d) of the first paragraph.
13. For the purposes of subheadings 2202 99 11 and 2202 99 15, the protein content shall be determined by multiplying the total nitrogen content, calculated using the method laid down in points 2 to 8 of part C of Annex III to Commission Regulation (EC) No 152/2009 <sup>(1)</sup>, by the factor of 6,25.

## CHAPTER 23

**RESIDUES AND WASTE FROM THE FOOD INDUSTRIES; PREPARED ANIMAL FODDER****Note**

1. Heading 2309 includes products of a kind used in animal feeding, not elsewhere specified or included, obtained by processing vegetable or animal materials to such an extent that they have lost the essential characteristics of the original material, other than vegetable waste, vegetable residues and by-products of such processing.

**Subheading note**

1. For the purposes of subheading 2306 41, the expression 'low erucic acid rape or colza seeds' means seeds as defined in subheading note 1 to Chapter 12.

**Additional notes**

1. *Subheadings 2303 10 11 and 2303 10 19 include only residues from the manufacture of starch from maize and do not cover blends of such residues with products derived from other plants or products derived from maize otherwise than in the course of the production of starch by the wet process.*

*Their starch content may not exceed 28 % by weight on the dry product, in accordance with the method contained in Annex III, part L, to Commission Regulation (EC) No 152/2009, and their fat content cannot exceed 4,5 % by weight on the dry product, determined in accordance with the method contained in Annex III, part H, to Commission Regulation (EC) No 152/2009.*

2. *Subheading 2306 90 05 includes only residues from the extraction of oil of germs of maize and containing the following ingredients in the quantities specified, calculated by weight on the dry product:*

*(a) products of an oil content of less than 3 %:*

*— starch content: less than 45 %,*

*— protein content (nitrogen content  $\times$  6,25): not less than 11,5 %;*

*(b) products of an oil content of not less than 3 % and not more than 8 %:*

*— starch content: less than 45 %,*

*— protein content (nitrogen content  $\times$  6,25): not less than 13 %.*

*Moreover, such residues shall not contain ingredients which are not obtained from maize grains.*

*For the determination of the starch and protein content, the methods set out in Commission Regulation (EC) No 152/2009, Annex III, parts L and C, are to be applied.*

*For the determination of the oil and moisture content, the methods set out in Commission Regulation (EC) No 152/2009, Annex III, parts H and A, respectively, are to be applied.*

*Products containing components from parts of maize grains which have been added after processing and have not been subjected to the oil extraction process are excluded.*

3. *For the purposes of subheadings 2307 00 11, 2307 00 19, 2308 00 11 and 2308 00 19, the following expressions shall have the meanings hereby assigned to them:*

*— 'actual alcoholic strength by mass': the number of kilograms of pure alcohol contained in 100 kg of the product,*

▼ **M216**

- ‘potential alcoholic strength by mass’: the number of kilograms of pure alcohol capable of being produced by total fermentation of the sugars contained in 100 kg of the product,
  - ‘total alcoholic strength by mass’: the sum of the actual and potential alcoholic strengths by mass,
  - ‘% mas’: the symbol for alcoholic strength by mass.
4. For the purposes of subheadings 2309 10 11 to 2309 10 70 and 2309 90 31 to 2309 90 70, the expression ‘milk products’ means the products of headings 0401, 0402, 0404, 0405 and 0406 and of subheadings 0403 10 11 to 0403 10 39, 0403 90 11 to 0403 90 69, 1702 11 00, 1702 19 00 and 2106 90 51.
5. Subheading 2309 90 20 includes only residues from the manufacture of starch from maize, and does not cover blends of such residues with products derived from other plants or products derived from maize otherwise than in the course of the production of starch by the wet process, containing:
- screenings from maize used in the wet process in a proportion not exceeding 15 % by weight, and/or
  - residues of maize steep-water, from the wet process, including residues of steep-water used for the manufacture of alcohol or of other starch derived products.

*These products may also contain residues from the extraction of maize germ oil by the wet milling process.*

*Their starch content may not exceed 28 % by weight on the dry product in accordance with the method contained in Annex III, part L, to Commission Regulation (EC) No 152/2009, their fat content may not exceed 4,5 % by weight on the dry product determined in accordance with the method contained in Annex III, part H, to Commission Regulation (EC) No 152/2009, and their protein content may not exceed 40 % on the dry product determined in accordance with the method contained in Annex III, part C, to Commission Regulation (EC) No 152/2009.*

## CHAPTER 24

**TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES****Note**

1. This chapter does not cover medicinal cigarettes (Chapter 30).

**Subheading note**

1. For the purposes of subheading 2403 11, the expression ‘water-pipe tobacco’ means tobacco intended for smoking in a water pipe and which consists of a mixture of tobacco and glycerol, whether or not containing aromatic oils and extracts, molasses or sugar, and whether or not flavoured with fruit. However, tobacco-free products intended for smoking in a water pipe are excluded from this subheading.

▼ **M216***SECTION V***MINERAL PRODUCTS***CHAPTER 25***SALT; SULPHUR; EARTHS AND STONE; PLASTERING MATERIALS,  
LIME AND CEMENT****Notes**

1. Except where their context or note 4 to this chapter otherwise requires, the headings of this chapter cover only products which are in the crude state or which have been washed (even with chemical substances eliminating the impurities without changing the structure of the product), crushed, ground, powdered, levigated, sifted, screened, concentrated by flotation, magnetic separation or other mechanical or physical processes (except crystallisation), but not products which have been roasted, calcined, obtained by mixing or subjected to processing beyond that mentioned in each heading.

The products of this chapter may contain an added anti-dusting agent, provided that such addition does not render the product particularly suitable for specific use rather than for general use.

2. This chapter does not cover:
- (a) sublimed sulphur, precipitated sulphur or colloidal sulphur (heading 2802);
  - (b) earth colours containing 70 % or more by weight of combined iron evaluated as  $\text{Fe}_2\text{O}_3$  (heading 2821);
  - (c) medicaments or other products of Chapter 30;
  - (d) perfumery, cosmetic or toilet preparations (Chapter 33);
  - (e) setts, curbstones or flagstones (heading 6801); mosaic cubes or the like (heading 6802); roofing, facing or damp-course slates (heading 6803);
  - (f) precious or semi-precious stones (heading 7102 or 7103);
  - (g) cultured crystals (other than optical elements) weighing not less than 2,5 g each, of sodium chloride or of magnesium oxide, of heading 3824; optical elements of sodium chloride or of magnesium oxide (heading 9001);
  - (h) billiard chalks (heading 9504); or
  - (ij) writing or drawing chalks or tailors' chalks (heading 9609).
3. Any products classifiable in heading 2517 and any other heading of the chapter are to be classified in heading 2517.
4. Heading 2530 applies, inter alia, to: vermiculite, perlite and chlorites, unexpanded; earth colours, whether or not calcined or mixed together; natural micaceous iron oxides; meerschaum (whether or not in polished pieces); amber; agglomerated meerschaum and agglomerated amber, in plates, rods, sticks or similar forms, not worked after moulding; jet; strontianite (whether or not calcined), other than strontium oxide; broken pieces of pottery, brick or concrete.

**▼M216***CHAPTER 26***ORES, SLAG AND ASH****Notes**

1. This chapter does not cover:
  - (a) slag or similar industrial waste prepared as macadam (heading 2517);
  - (b) natural magnesium carbonate (magnesite), whether or not calcined (heading 2519);
  - (c) sludges from the storage tanks of petroleum oils, consisting mainly of such oils (heading 2710);
  - (d) basic slag of Chapter 31;
  - (e) slag wool, rock wool or similar mineral wools (heading 6806);
  - (f) waste or scrap of precious metal or of metal clad with precious metal; other waste or scrap containing precious metal or precious-metal compounds, of a kind used principally for the recovery of precious metal (heading 7112); or
  - (g) copper, nickel or cobalt mattes produced by any process of smelting (Section XV).
2. For the purposes of headings 2601 to 2617, the term 'ores' means minerals of mineralogical species actually used in the metallurgical industry for the extraction of mercury, of the metals of heading 2844 or of the metals of Section XIV or XV, even if they are intended for non-metallurgical purposes. Headings 2601 to 2617 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.
3. Heading 2620 applies only to:
  - (a) slag, ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals, excluding ash and residues from the incineration of municipal waste (heading 2621); and
  - (b) slag, ash and residues containing arsenic, whether or not containing metals, of a kind used either for the extraction of arsenic or metals or for the manufacture of their chemical compounds.

**Subheading notes**

1. For the purposes of subheading 2620 21, 'leaded gasoline sludges and leaded anti-knock compound sludges' mean sludges obtained from storage tanks of leaded gasoline and leaded anti-knock compounds (for example, tetraethyl lead), and consisting essentially of lead, lead compounds and iron oxide.
2. Slag, ash and residues containing arsenic, mercury, thallium or their mixtures, of a kind used for the extraction of arsenic or those metals or for the manufacture of their chemical compounds, are to be classified in subheading 2620 60.

**▼M216***CHAPTER 27***MINERAL FUELS, MINERAL OILS AND PRODUCTS OF THEIR DISTILLATION; BITUMINOUS SUBSTANCES; MINERAL WAXES****Notes**

1. This chapter does not cover:
  - (a) separate chemically defined organic compounds, other than pure methane and propane which are to be classified in heading 2711;
  - (b) medicaments of heading 3003 or 3004; or
  - (c) mixed unsaturated hydrocarbons of heading 3301, 3302 or 3805.
2. References in heading 2710 to 'petroleum oils and oils obtained from bituminous minerals' include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided that the weight of the non-aromatic constituents exceeds that of the aromatic constituents.

However, the references do not include liquid synthetic polyolefins of which less than 60 % by volume distils at 300 °C, after conversion to 1 013 mbar when a reduced-pressure distillation method is used (Chapter 39).

3. For the purposes of heading 2710, 'waste oils' means waste containing mainly petroleum oils and oils obtained from bituminous minerals (as described in note 2 to this chapter), whether or not mixed with water. These include:
  - (a) such oils no longer fit for use as primary products (for example, used lubricating oils, used hydraulic oils and used transformer oils);
  - (b) sludge oils from the storage tanks of petroleum oils, mainly containing such oils and a high concentration of additives (for example, chemicals) used in the manufacture of the primary products; and
  - (c) such oils in the form of emulsions in water or mixtures with water, such as those resulting from oil spills, storage tank washings, or from the use of cutting oils for machining operations.

**Subheading notes**

1. For the purposes of subheading 2701 11, 'anthracite' means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14 %.
2. For the purposes of subheading 2701 12, 'bituminous coal' means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14 % and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5 833 kcal/kg.
3. For the purposes of subheadings 2707 10, 2707 20, 2707 30 and 2707 40, the terms 'benzol (benzene)', 'toluol (toluene)', 'xylool (xylenes)' and 'naphthalene' apply to products which contain more than 50 % by weight of benzene, toluene, xylenes or naphthalene, respectively.

**▼M216**

4. For the purposes of subheading 2710 12, 'light oils and preparations' are those of which 90 % or more by volume (including losses) distil at 210 °C according to the ISO 3405 method (equivalent to the ASTM D 86 method).
5. For the purposes of the subheadings of heading 2710, the term 'biodiesel' means mono-alkyl esters of fatty acids of a kind used as a fuel, derived from animal or vegetable fats and oils whether or not used.

**Additional notes<sup>(1)</sup>**

1. For the purposes of subheading 2707 99 80, the term 'phenols' applies to products which contain more than 50 % by weight of phenols.

2. For the purposes of heading 2710:

(a) 'special spirits' (subheadings 2710 12 21 and 2710 12 25) mean light oils as defined in subheading note 4 to this chapter, not containing any anti-knock preparations, and with a difference of not more than 60 °C between the temperatures at which 5 % and 90 % by volume (including losses) distil;

(b) 'white spirit' (subheading 2710 12 21) means special spirits as defined in paragraph (a) above with a flash-point higher than 21 °C by the EN ISO 13736 method;

(c) 'medium oils' (subheadings 2710 19 11 to 2710 19 29) mean oils and preparations of which less than 90 % by volume (including losses) distils at 210 °C and 65 % or more by volume (including losses) distils at 250 °C by the ISO 3405 method (equivalent to the ASTM D 86 method);

(d) 'heavy oils' (subheadings 2710 19 31 to 2710 19 99 and 2710 20 11 to 2710 20 90) mean oils and preparations of which less than 65 % by volume (including losses) distils at 250 °C by the ISO 3405 method (equivalent to the ASTM D 86 method) or of which the distillation percentage at 250 °C cannot be determined by that method;

(e) 'gas oils' (subheadings 2710 19 31 to 2710 19 48 and 2710 20 11 to 2710 20 19) mean heavy oils as defined in paragraph (d) above of which 85 % or more by volume (including losses) distils at 350 °C by the ISO 3405 method (equivalent to the ASTM D 86 method);

(f) 'fuel oils' (subheadings 2710 19 51 to 2710 19 68 and 2710 20 31 to 2710 20 39) mean heavy oils as defined in paragraph (d) above (other than gas oils as defined in paragraph (e)) which, for a corresponding diluted colour C, have a viscosity V:

— not exceeding that shown in line I of the following table when the sulphated ashes content is less than 1 % by the ISO 3987 method and the saponification number is less than 4 by the ISO 6293-1 or 6293-2 method (except where the product contains one or more bio-components, in which case the requirement in this indent for the saponification number to be less than 4 does not apply),

— exceeding that shown in line II when the pour point is not less than 10 °C by the ISO 3016 method,

<sup>(1)</sup> Unless otherwise stated, the term 'method' means the latest version of the determination methods laid down by the Comité européen de normalisation (CEN), the International Standardisation Organisation (ISO), or the American Society for Testing and Materials (ASTM).

▼ **M216**

- exceeding that shown in line I but not exceeding that shown in line II when 25 % or more by volume distils at 300 °C by the ISO 3405 method (equivalent to the ASTM D 86 method) or, if less than 25 % by volume distils at 300 °C, when the pour point is higher than 10 °C below zero by the ISO 3016 method. These provisions apply only to oils having a diluted colour C of less than 2.

**Diluted colour C/Viscosity V concordance table**

Colour C		0	0,5	1	1,5	2	2,5	3	3,5	4	4,5	5	5,5	6	6,5	7	7,5 and above
Viscosity V	I	4	4	4	5,4	9	15,1	25,3	42,4	71,1	119	200	335	562	943	1 580	2 650
	II	7	7	7	7	9	15,1	25,3	42,4	71,1	119	200	335	562	943	1 580	2 650

The term 'viscosity V' means the kinematic viscosity at 50 °C expressed in  $10^{-6} \text{ m}^2 \text{ s}^{-1}$  by the EN ISO 3104 method.

The term 'diluted colour C' means the colour of a product, as determined by the ISO 2049 method (equivalent to the ASTM D 1 500 method), after one part of the product has been made up to 100 parts by volume with xylene, toluene or another suitable solvent. The colour must be determined immediately after dilution.

The term 'bio-components' means animal or vegetable fats, animal or vegetable oils, or mono-alkyl esters of fatty acids (FAMAE).

Subheadings 2710 19 51 to 2710 19 68 and 2710 20 31 to 2710 20 39 cover only fuel oils of natural colour.

These subheadings do not cover heavy oils defined in paragraph (d) above for which it is not possible to determine:

- the distillation percentage (zero shall be deemed to be a percentage) at 250 °C by the ISO 3405 method (equivalent to the ASTM D 86 method),
- the kinematic viscosity at 50 °C by the EN ISO 3104 method,
- or the diluted colour C by the ISO 2049 method (equivalent to the ASTM D 1500 method).

Such products fall in subheadings 2710 19 71 to 2710 19 99 or 2710 20 90;

- (g) 'containing biodiesel' means that the products of subheading 2710 20 have a minimum content of biodiesel, i.e. mono-alkyl esters of fatty acids (FAMAE) of a kind used as a fuel, of 0,5 % by volume (determination by the EN 14078 method).
3. For the purposes of heading 2712, the expression 'crude petroleum jelly' (subheading 2712 10 10) is to be taken to apply to petroleum jelly of a natural colour higher than 4,5 by the ISO 2049 method (equivalent to the ASTM D 1500 method).
4. For the purposes of subheadings 2712 90 31 to 2712 90 39, the term 'crude' is to be taken to apply to products:
- (a) with an oil content of 3,5 % by weight or higher, if their viscosity at 100 °C is lower than  $9 \times 10^{-6} \text{ m}^2 \text{ s}^{-1}$  by the EN ISO 3104 method; or

## ▼M216

(b) of a natural colour higher than 3 by the ISO 2049 method (equivalent to the ASTM D 1500 method), if their viscosity at 100 °C is  $9 \times 10^{-6} \text{ m}^2 \text{ s}^{-1}$  or higher by the EN ISO 3104 method.

5. For the purposes of headings 2710, 2711 and 2712, the term 'specific process' is to be taken to apply to the following operations:

- (a) vacuum distillation;
- (b) redistillation by a very thorough fractionation process;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (ij) isomerisation;
- (k) (in respect of products of subheadings 2710 19 31 to 2710 19 99 only) desulphurisation with hydrogen resulting in a reduction of at least 85 % of the sulphur content of the products processed (EN ISO 20846, EN ISO 20884 or EN ISO 14596 or EN ISO 24260, EN ISO 20847 and EN ISO 8754 methods);
- (l) (in respect of products of heading 2710 only) deparaffining by a process other than filtering;
- (m) (in respect of products of subheadings 2710 19 31 to 2710 19 99 only) treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250 °C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of subheadings 2710 19 71 to 2710 19 99 (for example, hydrofinishing or decolorisation) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- (n) (in respect of products of subheadings 2710 19 51 to 2710 19 68 only) atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C by the ISO 3405 method (equivalent to the ASTM D 86 method). If 30 % or more by volume, including losses, of such products distils at 300 °C by the ISO 3405 method (equivalent to the ASTM D 86 method), the quantities of products which may be obtained during the atmospheric distillation and which fall in subheadings 2710 12 11 to 2710 12 90 or 2710 19 11 to 2710 19 29 shall be dutiable at the same rates as those provided for under subheadings 2710 19 62 to 2710 19 68 according to the kind and value of the products used and on the net weight of the products obtained. This rule shall not apply to products so obtained which, within a period of six months and subject to such other conditions as may be determined by the competent authorities, are to undergo a specific process or chemical transformation by a process not being a specific process;
- (o) (in respect of products of subheadings 2710 19 71 to 2710 19 99 only) treatment by means of a high-frequency electrical brush-discharge;
- (p) solely for products of subheading 2712 90 31: de-oiling by fractional crystallisation.

## ▼M216

*Should any preparatory treatment prior to the above treatments be necessary by reason of technical requirements, the customs exemption is to apply only to the quantities of the products intended for and actually subjected to such of the above treatments; any waste products arising during preparatory treatment are also to be exempt from customs duty.*

6. *The quantities of products which may be obtained during chemical transformation, or during preparatory treatment which may be necessary by reason of technical requirements, and which fall in headings or subheadings 2707 10 00, 2707 20 00, 2707 30 00, 2707 50 00, 2710, 2711, 2712 10, 2712 20, 2712 90 31 to 2712 90 99 and 2713 90 are to be dutiable at the same rates as those provided for in respect of products 'for other purposes', according to the kind and value of the products used and on the net weight of the products obtained. This rule is not to apply to such products of headings 2710 to 2712 which, within a period of six months and subject to such other conditions as may be determined by the competent authorities, are to undergo a specific process or further chemical transformation.*

▼ **M216***SECTION VI***PRODUCTS OF THE CHEMICAL OR ALLIED INDUSTRIES****Notes**

1. (A) Goods (other than radioactive ores) answering to a description in heading 2844 or 2845 are to be classified in those headings and in no other heading of the nomenclature.
 

(B) Subject to paragraph (A) above, goods answering to a description in heading 2843, 2846 or 2852 are to be classified in those headings and in no other heading of this section.
2. Subject to note 1 above, goods classifiable in heading 3004, 3005, 3006, 3212, 3303, 3304, 3305, 3306, 3307, 3506, 3707 or 3808 by reason of being put up in measured doses or for retail sale are to be classified in those headings and in no other heading of the nomenclature.
3. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
  - (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
  - (b) presented together; and
  - (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

*CHAPTER 28***INORGANIC CHEMICALS; ORGANIC OR INORGANIC COMPOUNDS OF PRECIOUS METALS, OF RARE-EARTH METALS, OF RADIOACTIVE ELEMENTS OR OF ISOTOPES****Notes**

1. Except where the context otherwise requires, the headings of this chapter apply only to:
  - (a) separate chemical elements and separate chemically defined compounds, whether or not containing impurities;
  - (b) the products mentioned in (a) above dissolved in water;
  - (c) the products mentioned in (a) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
  - (d) the products mentioned in (a), (b) or (c) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;
  - (e) the products mentioned in (a), (b), (c) or (d) above with an added anti-dusting agent or a colouring substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use.

**▼M216**

2. In addition to dithionites and sulphyoxylates, stabilised with organic substances (heading 2831), carbonates and peroxocarbonates of inorganic bases (heading 2836), cyanides, cyanide oxides and complex cyanides of inorganic bases (heading 2837), fulminates, cyanates and thiocyanates, of inorganic bases (heading 2842), organic products included in headings 2843 to 2846 and 2852 and carbides (heading 2849), only the following compounds of carbon are to be classified in this chapter:
  - (a) oxides of carbon, hydrogen cyanide and fulminic, isocyanic, thiocyanic and other simple or complex cyanogen acids (heading 2811);
  - (b) halide oxides of carbon (heading 2812);
  - (c) carbon disulphide (heading 2813);
  - (d) thiocarbonates, selenocarbonates, tellurocarbonates, selenocyanates, tellurocyanates, tetrathiocyanatodiamminochromates (reineckates) and other complex cyanates, of inorganic bases (heading 2842);
  - (e) hydrogen peroxide, solidified with urea (heading 2847), carbon oxysulphide, thiocarbonyl halides, cyanogen, cyanogen halides and cyanamide and its metal derivatives (heading 2853) other than calcium cyanamide, whether or not pure (Chapter 31).
3. Subject to the provisions of note 1 to Section VI, this chapter does not cover:
  - (a) sodium chloride or magnesium oxide, whether or not pure, or other products of Section V;
  - (b) organo-inorganic compounds other than those mentioned in note 2 above;
  - (c) products mentioned in note 2, 3, 4 or 5 to Chapter 31;
  - (d) inorganic products of a kind used as luminophores, of heading 3206; glass frit and other glass in the form of powder, granules or flakes, of heading 3207;
  - (e) artificial graphite (heading 3801); products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading 3813; ink removers put up in packings for retail sale, of heading 3824; cultured crystals (other than optical elements) weighing not less than 2,5 g each, of the halides of the alkali or alkaline-earth metals, of heading 3824;
  - (f) precious or semi-precious stones (natural, synthetic or reconstructed) or dust or powder of such stones (headings 7102 to 7105), or precious metals or precious-metal alloys of Chapter 71;
  - (g) the metals, whether or not pure, metal alloys or cermets, including sintered metal carbides (metal carbides sintered with a metal), of Section XV; or
  - (h) optical elements, for example, of the halides of the alkali or alkaline-earth metals (heading 9001).
4. Chemically defined complex acids consisting of a non-metal acid of sub-chapter II and a metal acid of sub-chapter IV are to be classified in heading 2811.
5. Headings 2826 to 2842 apply only to metal or ammonium salts or peroxy salts.

**▼M216**

Except where the context otherwise requires, double or complex salts are to be classified in heading 2842.

6. Heading 2844 applies only to:

- (a) technetium (atomic No 43), promethium (atomic No 61), polonium (atomic No 84) and all elements with an atomic number greater than 84;
- (b) natural or artificial radioactive isotopes (including those of the precious metals or of the base metals of Sections XIV and XV), whether or not mixed together;
- (c) compounds, inorganic or organic, of these elements or isotopes, whether or not chemically defined, whether or not mixed together;
- (d) alloys, dispersions (including cermets), ceramic products and mixtures containing these elements or isotopes or inorganic or organic compounds thereof and having a specific radioactivity exceeding 74 Bq/g (0,002 µCi/g);
- (e) spent (irradiated) fuel elements (cartridges) of nuclear reactors;
- (f) radioactive residues whether or not usable.

The term 'isotopes', for the purposes of this note and of the wording of headings 2844 and 2845, refers to:

- individual nuclides, excluding, however, those existing in nature in the monoisotopic state,
- mixtures of isotopes of one and the same element, enriched in one or several of the said isotopes, that is, elements of which the natural isotopic composition has been artificially modified.

7. Heading 2853 includes copper phosphide (phosphor copper) containing more than 15 % by weight of phosphorus.

8. Chemical elements (for example, silicon and selenium) doped for use in electronics are to be classified in this chapter, provided that they are in forms unworked as drawn, or in the form of cylinders or rods. When cut in the form of discs, wafers or similar forms, they fall in heading 3818.

**Subheading note**

1. For the purposes of subheading 2852 10, the expression 'chemically defined' means all organic or inorganic compounds of mercury meeting the requirements of paragraphs (a) to (e) of note 1 to Chapter 28 or paragraphs (a) to (h) of note 1 to Chapter 29.

**Additional note**

1. Unless provided otherwise, the salts specified in subheadings include acid salts and basic salts.

▼ **M216***CHAPTER 29***ORGANIC CHEMICALS****Notes**

1. Except where the context otherwise requires, the headings of this chapter apply only to:
  - (a) separate chemically defined organic compounds, whether or not containing impurities;
  - (b) mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (Chapter 27);
  - (c) the products of headings 2936 to 2939 or the sugar ethers, sugar acetals and sugar esters, and their salts, of heading 2940, or the products of heading 2941, whether or not chemically defined;
  - (d) the products mentioned in (a), (b) or (c) above dissolved in water;
  - (e) the products mentioned in (a), (b) or (c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for a specific use rather than for general use;
  - (f) the products mentioned in (a), (b), (c), (d) or (e) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;
  - (g) the products mentioned in (a), (b), (c), (d), (e) or (f) above with an added anti-dusting agent or a colouring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for a specific use rather than for general use;
  - (h) the following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotizable amines and their salts.
2. This chapter does not cover:
  - (a) goods of heading 1504 or crude glycerol of heading 1520;
  - (b) ethyl alcohol (heading 2207 or 2208);
  - (c) methane or propane (heading 2711);
  - (d) the compounds of carbon mentioned in note 2 to Chapter 28;
  - (e) immunological products of heading 3002;
  - (f) urea (heading 3102 or 3105);
  - (g) colouring matter of vegetable or animal origin (heading 3203), synthetic organic colouring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (heading 3204) or dyes or other colouring matter put up in forms or packings for retail sale (heading 3212);
  - (h) enzymes (heading 3507);

**▼M216**

- (ij) metaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding 300 cm<sup>3</sup> (heading 3606);
  - (k) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading 3813; ink removers put up in packings for retail sale, of heading 3824; or
  - (l) optical elements, for example, of ethylenediamine tartrate (heading 9001).
3. Goods which could be included in two or more of the headings of this chapter are to be classified in that one of those headings which occurs last in numerical order.
4. In headings 2904 to 2906, 2908 to 2911 and 2913 to 2920, any reference to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.

Nitro or nitroso groups are not to be taken as 'nitrogen-functions' for the purposes of heading 2929.

For the purposes of headings 2911, 2912, 2914, 2918 and 2922, 'oxygen-function' is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in headings 2905 to 2920.

5. (A) The esters of acid-function organic compounds of sub-chapters I to VII with organic compounds of these sub-chapters are to be classified with that compound which is classified in the heading which occurs last in numerical order in these sub-chapters.
- (B) Esters of ethyl alcohol with acid-function organic compounds of sub-chapters I to VII are to be classified in the same heading as the corresponding acid-function compounds.
- (C) Subject to note 1 to Section VI and note 2 to Chapter 28:
- (1) inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of sub-chapters I to X or heading 2942, are to be classified in the heading appropriate to the organic compound;
  - (2) salts formed between organic compounds of sub-chapters I to X or heading 2942 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the chapter; and
  - (3) coordination compounds, other than products classifiable in sub-chapter XI or heading 2941, are to be classified in the heading which occurs last in numerical order in Chapter 29, among those appropriate to the fragments formed by 'cleaving' of all metal bonds, other than metal-carbon bonds.
- (D) Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol (heading 2905).
- (E) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.

▼ **M216**

6. The compounds of headings 2930 and 2931 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic or lead) directly linked to carbon atoms.

Heading 2930 (organo-sulphur compounds) and heading 2931 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).

7. Headings 2932, 2933 and 2934 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids.

These provisions apply only when the ring-position hetero-atoms are those resulting solely from the cyclising function or functions here listed.

8. For the purposes of heading 2937:
- (a) the term 'hormones' includes hormone-releasing or hormone-stimulating factors, hormone inhibitors and hormone antagonists (anti-hormones);
- (b) the expression 'used primarily as hormones' applies not only to hormone derivatives and structural analogues used primarily for their hormonal effect, but also to those derivatives and structural analogues used primarily as intermediates in the synthesis of products of this heading.

**Subheading notes**

1. Within any one heading of this chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds), provided that they are not more specifically covered by any other subheading and that there is no residual subheading named 'Other' in the series of subheadings concerned.
2. Note 3 to Chapter 29 does not apply to the subheadings of this chapter.

2935 50 00	– Other perfluorooctane sulphonamides .....	6,5	—
2935 90	– <b>Other:</b>		
2935 90 30	– – 3-[1-[7-(Hexadecylsulphonylamino)-1 <i>H</i> -indole-3-yl]-3-oxo-1 <i>H</i> ,3 <i>H</i> -naphtho[1,8- <i>cd</i> ]pyran-1-yl]- <i>N,N</i> -dimethyl-1 <i>H</i> -indole-7-sulphonamide; metosulam (ISO) .....	Free	—
2935 90 90	– – Other .....	6,5	—
	<b>XI. PROVITAMINS, VITAMINS AND HORMONES</b>		
2936	<b>Provitamins and vitamins, natural or reproduced by synthesis (including natural concentrates), derivatives thereof used primarily as vitamins, and intermixtures of the foregoing, whether or not in any solvent:</b>		
	– <b>Vitamins and their derivatives, unmixed:</b>		
2936 21 00	– – Vitamins A and their derivatives .....	Free	—
2936 22 00	– – Vitamin B <sub>1</sub> and its derivatives .....	Free	—
2936 23 00	– – Vitamin B <sub>2</sub> and its derivatives .....	Free	—
2936 24 00	– – D- or DL-Pantothenic acid (vitamin B <sub>3</sub> or vitamin B <sub>5</sub> ) and its derivatives .....	Free	—
2936 25 00	– – Vitamin B <sub>6</sub> and its derivatives .....	Free	—
2936 26 00	– – Vitamin B <sub>12</sub> and its derivatives .....	Free	—

## ▼M216

CN code	Description	Conventional rate of duty (%)	Supplementary unit
1	2	3	4
2936 27 00	– – Vitamin C and its derivatives .....	Free	—
2936 28 00	– – Vitamin E and its derivatives .....	Free	—
2936 29 00	– – Other vitamins and their derivatives .....	Free	—
2936 90 00	– Other, including natural concentrates .....	Free	—
2937	<b>Hormones, prostaglandins, thromboxanes and leukotrienes, natural or reproduced by synthesis; derivatives and structural analogues thereof, including chain modified polypeptides, used primarily as hormones:</b>		
	– <b>Polypeptide hormones, protein hormones and glycoprotein hormones, their derivatives and structural analogues:</b>		
2937 11 00	– – Somatotropin, its derivatives and structural analogues ....	Free	g
2937 12 00	– – Insulin and its salts .....	Free	g
2937 19 00	– – Other .....	Free	g
	– <b>Steroidal hormones, their derivatives and structural analogues:</b>		
2937 21 00	– – Cortisone, hydrocortisone, prednisone (dehydrocortisone) and prednisolone (dehydrohydrocortisone) .....	Free	g
2937 22 00	– – Halogenated derivatives of corticosteroidal hormones .....	Free	g
2937 23 00	– – Oestrogens and progestogens .....	Free	g
2937 29 00	– – Other .....	Free	g
2937 50 00	– Prostaglandins, thromboxanes and leukotrienes, their derivatives and structural analogues .....	Free	g
2937 90 00	– Other .....	Free	g
	<b>XII. GLYCOSIDES AND ALKALOIDS, NATURAL OR REPRODUCED BY SYNTHESIS, AND THEIR SALTS, ETHERS, ESTERS AND OTHER DERIVATIVES</b>		
2938	<b>Glycosides, natural or reproduced by synthesis, and their salts, ethers, esters and other derivatives:</b>		
2938 10 00	– Rutoside (rutin) and its derivatives .....	6,5	—
2938 90	– Other:		
2938 90 10	– – Digitalis glycosides .....	6	—
2938 90 30	– – Glycyrrhizic acid and glycyrrhizates .....	5,7	—
2938 90 90	– – Other .....	6,5	—
2939	<b>Alkaloids, natural or reproduced by synthesis, and their salts, ethers, esters and other derivatives:</b>		
	– Alkaloids of opium and their derivatives; salts thereof:		

## ▼M216

CN code	Description	Conventional rate of duty (%)	Supplementary unit
1	2	3	4
2939 11 00	– – Concentrates of poppy straw; buprenorphine (INN), codeine, dihydrocodeine (INN), ethylmorphine, etorphine (INN), heroin, hydrocodone (INN), hydromorphone (INN), morphine, nicomorphine (INN), oxycodone (INN), oxymorphone (INN), pholcodine (INN), thebacon (INN) and thebaine; salts thereof .....	Free	—
2939 19 00	– – Other .....	Free	—
2939 20 00	– Alkaloids of cinchona and their derivatives; salts thereof ...	Free	—
2939 30 00	– Caffeine and its salts .....	Free	—
	– Ephedrine and their salts:		
2939 41 00	– – Ephedrine and its salts .....	Free	—
2939 42 00	– – Pseudoephedrine (INN) and its salts .....	Free	—
2939 43 00	– – Cathine (INN) and its salts .....	Free	—
2939 44 00	– – Norephedrine and its salts .....	Free	—
2939 49 00	– – Other .....	Free	—
	– Theophylline and aminophylline (theophylline-ethylene-diamine) and their derivatives; salts thereof:		
2939 51 00	– – Fenetylline (INN) and its salts .....	Free	—
2939 59 00	– – Other .....	Free	—
	– Alkaloids of rye ergot and their derivatives; salts thereof:		
2939 61 00	– – Ergometrine (INN) and its salts .....	Free	—
2939 62 00	– – Ergotamine (INN) and its salts .....	Free	—
2939 63 00	– – Lysergic acid and its salts .....	Free	—
2939 69 00	– – Other .....	Free	—
	– Other, of vegetal origin:		
2939 71 00	– – Cocaine, ecgonine, levometamfetamine, metamfetamine (INN), metamfetamine racemate; salts, esters and other derivatives thereof .....	Free	—
2939 79	– – Other:		
2939 79 10	– – – Nicotine and its salts, ethers, esters and other derivatives thereof .....	Free	—
2939 79 90	– – – Other .....	Free	—
2939 80 00	– Other .....	Free	—
	<b>XIII. OTHER ORGANIC COMPOUNDS</b>		
2940 00 00	Sugars, chemically pure, other than sucrose, lactose, maltose, glucose and fructose; sugar ethers, sugar acetals and sugar esters, and their salts, other than products of heading 2937, 2938 or 2939 .....	6,5	—
