**PHOTOGRAPHIC OR CINEMATOGRAPHIC GOODS****Notes**

1. This chapter does not cover waste or scrap.
2. In this chapter, the word 'photographic' relates to the process by which visible images are formed, directly or indirectly, by the action of light or other forms of radiation on photosensitive surfaces.

**Additional notes**

1. *In the case of sound films imported in two bands (the band bearing only the images and the band used for recording the sound), each band is to be classified in its appropriate heading.*
2. *The expression 'newsreels' (subheading 3706 90 52) is to be taken to apply to films of length of less than 330 m, and depicting current events of a political, sporting, military, scientific, literary, folkloric, touristic, society, etc., nature.*

▼ **M216***CHAPTER 38***MISCELLANEOUS CHEMICAL PRODUCTS****Notes**

1. This chapter does not cover:
  - (a) separate chemically defined elements or compounds with the exception of the following:
    - (1) artificial graphite (heading 3801);
    - (2) insecticides, rodenticides, fungicides, herbicides, anti-sprouting products and plant-growth regulators, disinfectants and similar products, put up as described in heading 3808;
    - (3) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades (heading 3813);
    - (4) certified reference materials specified in note 2 below;
    - (5) products specified in note 3(a) or 3(c) below;
  - (b) mixtures of chemicals with foodstuffs or other substances with nutritive value, of a kind used in the preparation of human foodstuffs (generally, heading 2106);
  - (c) slag, ash and residues (including sludges, other than sewage sludge), containing metals, arsenic or their mixtures and meeting the requirements of note 3(a) or 3(b) to Chapter 26 (heading 2620);
  - (d) medicaments (heading 3003 or 3004); or
  - (e) spent catalysts of a kind used for the extraction of base metals or for the manufacture of chemical compounds of base metals (heading 2620), spent catalysts of a kind used principally for the recovery of precious metal (heading 7112) or catalysts consisting of metals or metal alloys in the form of, for example, finely divided powder or woven gauze (Section XIV or XV).
2. (A) For the purpose of heading 3822, the expression 'certified reference materials' means reference materials which are accompanied by a certificate which indicates the values of the certified properties, the methods used to determine these values and the degree of certainty associated with each value and which are suitable for analytical, calibrating or referencing purposes.
  - (B) With the exception of the products of Chapter 28 or 29, for the classification of certified reference materials, heading 3822 shall take precedence over any other heading in the nomenclature.
3. Heading 3824 includes the following goods which are not to be classified in any other heading of the nomenclature:
  - (a) cultured crystals (other than optical elements) weighing not less than 2,5 g each, of magnesium oxide or of the halides of the alkali or alkaline-earth metals;
  - (b) fusel oil; Dippel's oil;
  - (c) ink removers put up in packings for retail sale;
  - (d) stencil correctors, other correcting fluids and correction tapes (other than those of heading 9612), put up in packings for retail sale; and

**▼M216**

- (e) ceramic firing testers, fusible (for example, Seger cones).
4. Throughout the nomenclature, 'municipal waste' means waste of a kind collected from households, hotels, restaurants, hospitals, shops, offices, etc., road and pavement sweepings, as well as construction and demolition waste. Municipal waste generally contains a large variety of materials such as plastics, rubber, wood, paper, textiles, glass, metals, food materials, broken furniture and other damaged or discarded articles. The term 'municipal waste', however, does not cover:
- (a) individual materials or articles segregated from the waste, such as wastes of plastics, rubber, wood, paper, textiles, glass or metals and spent batteries which fall in their appropriate headings of the nomenclature;
- (b) industrial waste;
- (c) waste pharmaceuticals, as defined in note 4(k) to Chapter 30; or
- (d) clinical waste, as defined in note 6(a) below.
5. For the purposes of heading 3825, 'sewage sludge' means sludge arising from urban effluent treatment plant and includes pre-treatment waste, scourings and unstabilised sludge. Stabilised sludge when suitable for use as fertiliser is excluded (Chapter 31).
6. For the purposes of heading 3825, the expression 'other wastes' applies to:
- (a) clinical waste, that is, contaminated waste arising from medical research, diagnosis, treatment or other medical, surgical, dental or veterinary procedures, which often contain pathogens and pharmaceutical substances and require special disposal procedures (for example, soiled dressings, used gloves and used syringes);
- (b) waste organic solvents;
- (c) wastes of metal pickling liquors, hydraulic fluids, brake fluids and anti-freezing fluids; and
- (d) other wastes from chemical or allied industries.

The expression 'other wastes' does not, however, cover wastes which contain mainly petroleum oils or oils obtained from bituminous minerals (heading 2710).

7. For the purposes of heading 3826, the term 'biodiesel' means mono-alkyl esters of fatty acids of a kind used as a fuel, derived from animal or vegetable fats and oils whether or not used.

▼ **M216***SECTION VII***PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF****Notes**

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
  - (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
  - (b) presented together; and
  - (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
2. Except for the goods of heading 3918 or 3919, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

*CHAPTER 39***PLASTICS AND ARTICLES THEREOF****Notes**

1. Throughout the nomenclature, the expression 'plastics' means those materials of headings 3901 to 3914 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

Throughout the nomenclature, any reference to 'plastics' also includes vulcanised fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.

2. This chapter does not cover:
  - (a) lubricating preparations of heading 2710 or 3403;
  - (b) waxes of heading 2712 or 3404;
  - (c) separate chemically defined organic compounds (Chapter 29);
  - (d) heparin or its salts (heading 3001);
  - (e) solutions (other than collodions) consisting of any of the products specified in headings 3901 to 3913 in volatile organic solvents when the weight of the solvent exceeds 50 % of the weight of the solution (heading 3208); stamping foils of heading 3212;
  - (f) organic surface-active agents or preparations of heading 3402;
  - (g) run gums or ester gums (heading 3806);
  - (h) prepared additives for mineral oils (including gasoline) or for other liquids used for the same purposes as mineral oils (heading 3811);

**▼M216**

- (ij) prepared hydraulic fluids based on polyglycols, silicones or other polymers of Chapter 39 (heading 3819);
  - (k) diagnostic or laboratory reagents on a backing of plastics (heading 3822);
  - (l) synthetic rubber, as defined for the purposes of Chapter 40, or articles thereof;
  - (m) saddlery or harness (heading 4201) or trunks, suitcases, handbags or other containers of heading 4202;
  - (n) plaits, wickerwork or other articles of Chapter 46;
  - (o) wallcoverings of heading 4814;
  - (p) goods of Section XI (textiles and textile articles);
  - (q) articles of Section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking sticks, whips, riding-crops or parts thereof);
  - (r) imitation jewellery of heading 7117;
  - (s) articles of Section XVI (machines and mechanical or electrical appliances);
  - (t) parts of aircraft or vehicles of Section XVII;
  - (u) articles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);
  - (v) articles of Chapter 91 (for example, clock or watch cases);
  - (w) articles of Chapter 92 (for example, musical instruments or parts thereof);
  - (x) articles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);
  - (y) articles of Chapter 95 (for example, toys, games, sports requisites); or
  - (z) articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette-holders or the like, parts of vacuum flasks or the like, pens, propelling pencils, and monopods, bipods, tripods and similar articles).
3. Headings 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:
- (a) liquid synthetic polyolefins of which less than 60 % by volume distils at 300 °C, after conversion to 1 013 mbar when a reduced-pressure distillation method is used (headings 3901 and 3902);
  - (b) resins, not highly polymerised, of the coumarone-indene type (heading 3911);
  - (c) other synthetic polymers with an average of at least five monomer units;
  - (d) silicones (heading 3910);
  - (e) resols (heading 3909) and other prepolymers.
4. The expression ‘copolymers’ covers all polymers in which no single monomer unit contributes 95 % or more by weight to the total polymer content.

**▼M216**

For the purposes of this chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this note, constituent comonomer units of polymers falling in the same heading shall be taken together.

If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.

5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
6. In headings 3901 to 3914, the expression 'primary forms' applies only to the following forms:
  - (a) liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
  - (b) blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.
7. Heading 3915 does not apply to waste, parings and scrap of a single thermo-plastic material, transformed into primary forms (headings 3901 to 3914).
8. For the purposes of heading 3917, the expression 'tubes, pipes and hoses' means hollow products, whether semi-manufactured or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed one-and-a-half times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
9. For the purposes of heading 3918, the expression 'wall or ceiling coverings of plastics' applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.
10. In headings 3920 and 3921, the expression 'plates, sheets, film, foil and strip' applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
11. Heading 3925 applies only to the following articles, not being products covered by any of the earlier headings of sub-chapter II:
  - (a) reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 litres;

**▼M216**

- (b) structural elements used, for example, in floors, walls or partitions, ceilings or roofs;
- (c) gutters and fittings therefor;
- (d) doors, windows and their frames and thresholds for doors;
- (e) balconies, balustrades, fencing, gates and similar barriers;
- (f) shutters, blinds (including venetian blinds) and similar articles and parts and fittings thereof;
- (g) large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
- (h) ornamental architectural features, for example, flutings, cupolas, dove-cotes; and
- (ij) fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

**Subheading notes**

1. Within any one heading of this chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:

- (a) where there is a subheading named 'Other' in the same series:
  - (1) the designation in a subheading of a polymer by the prefix 'poly' (for example, polyethylene and polyamide-6,6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95 % or more by weight of the total polymer content;
  - (2) the copolymers named in subheadings 3901 30, 3901 40, 3903 20, 3903 30 and 3904 30 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95 % or more by weight of the total polymer content;
  - (3) chemically modified polymers are to be classified in the subheading named 'Other', provided that the chemically modified polymers are not more specifically covered by another subheading;
  - (4) polymers not meeting (1), (2) or (3) above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared;
- (b) where there is no subheading named 'Other' in the same series:
  - (1) polymers are to be classified in the subheading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared;
  - (2) chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.

Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions.

2. For the purposes of subheading 3920 43, the term 'plasticisers' includes secondary plasticisers.

▼ **M216****Additional note**

1. Where the woven, knitted or crocheted fabrics, felt or nonwovens are present merely for reinforcing purposes, gloves, mittens or mitts impregnated, coated or covered with cellular plastics belong to Chapter 39, even if they are:

— made up from woven, knitted or crocheted fabrics (other than those of heading 5903), felt or nonwovens impregnated, coated or covered with cellular plastics, or

— made up from unimpregnated, uncoated or uncovered woven, knitted or crocheted fabrics, felt or nonwovens and subsequently impregnated, coated or covered with cellular plastics.

**▼M216***CHAPTER 40***RUBBER AND ARTICLES THEREOF****Notes**

1. Except where the context otherwise requires, throughout the nomenclature the expression 'rubber' means the following products, whether or not vulcanised or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.
2. This chapter does not cover:
  - (a) goods of Section XI (textiles and textile articles);
  - (b) footwear or parts thereof of Chapter 64;
  - (c) headgear or parts thereof (including bathing caps) of Chapter 65;
  - (d) mechanical or electrical appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;
  - (e) articles of Chapter 90, 92, 94 or 96; or
  - (f) articles of Chapter 95 (other than sports gloves, mittens and mitts and articles of headings 4011 to 4013).
3. In headings 4001 to 4003 and 4005, the expression 'primary forms' applies only to the following forms:
  - (a) liquids and pastes (including latex, whether or not pre-vulcanised, and other dispersions and solutions);
  - (b) blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
4. In note 1 to this chapter and in heading 4002, the expression 'synthetic rubber' applies to:
  - (a) unsaturated synthetic substances which can be irreversibly transformed by vulcanisation with sulphur into non-thermoplastic substances which, at a temperature between 18 and 29 °C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one-and-a-half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanising activators or accelerators, may be added; the presence of substances as provided for by note 5(B)(2) and (3) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticisers and fillers, is not permitted;
  - (b) thioplasts (TM); and
  - (c) natural rubber modified by grafting or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the abovementioned products comply with the requirements concerning vulcanisation, elongation and recovery in (a) above.

**▼M216**

5. (A) Headings 4001 and 4002 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:
- (1) vulcanising agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanised rubber latex);
  - (2) pigments or other colouring matter, other than those added solely for the purpose of identification;
  - (3) plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (B).
- (B) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading 4001 or 4002, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:
- (1) emulsifiers or anti-tack agents;
  - (2) small amounts of breakdown products of emulsifiers;
  - (3) very small amounts of the following: heat-sensitive agents (generally, for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally, for obtaining electropositive rubber latexes), anti-oxidants, coagulants, crumbling agents, freeze-resisting agents, peptisers, preservatives, stabilisers, viscosity-control agents, or similar special-purpose additives.
6. For the purposes of heading 4004, the expression ‘waste, parings and scrap’ means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.
7. Thread wholly of vulcanised rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading 4008.
8. Heading 4010 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.
9. In headings 4001, 4002, 4003, 4005 and 4008, the expressions ‘plates’, ‘sheets’ and ‘strip’ apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.

In heading 4008, the expressions ‘rods’ and ‘profile shapes’ apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

**Additional note**

1. *Where the woven, knitted or crocheted fabrics, felt or nonwovens are present merely for reinforcing purposes, gloves, mittens or mitts impregnated, coated or covered with cellular rubber belong to Chapter 40, even if they are:*

▼ **M216**

— made up from woven, knitted or crocheted fabrics (other than those of heading 5906), felt or nonwovens impregnated, coated or covered with cellular rubber, or

— made up from unimpregnated, uncoated or uncovered woven, knitted or crocheted fabrics, felt or nonwovens and subsequently impregnated, coated or covered with cellular rubber.

1. This chapter does not cover:
  - (a) parings or similar waste, of raw hides or skins (heading 0511);
  - (b) birdskins or parts of birdskins, with their feathers or down, of heading 0505 or 6701; or
  - (c) hides or skins, with the hair or wool on, raw, tanned or dressed (Chapter 43); the following are, however, to be classified in Chapter 41, namely, raw hides and skins with the hair or wool on, of bovine animals (including buffalo), of equine animals, of sheep or lambs (except Astrakhan, Broadtail, Caracul, Persian or similar lambs, Indian, Chinese, Mongolian or Tibetan lambs), of goats or kids (except Yemen, Mongolian or Tibetan goats and kids), of swine (including peccary), of chamois, of gazelle, of camels (including dromedaries), of reindeer, of elk, of deer, of roebucks or of dogs.
2. (A) Headings 4104 to 4106 do not cover hides and skins which have undergone a tanning (including pre-tanning) process which is reversible (headings 4101 to 4103, as the case may be).
 

(B) For the purposes of headings 4104 to 4106, the term 'crust' includes hides and skins that have been retanned, coloured or fat-liquored (stuffed) prior to drying.
3. Throughout the nomenclature, the expression 'composition leather' means only substances of the kind referred to in heading 4115.
